

Dear Business Partner;

We are happy to present our catalog with many new products.

As VIP-TEC family, our innovations will increase even more over time. At this point, our most important reference is the opinions and suggestions of our valued users.

Our aim is to help our professional users work fast, good and smart. We believe that pioneering, innovative and functional products should be accessible to everyone.

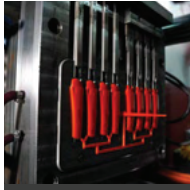

All of our products have been cleverly designed, well thought out and developed before the production phase, taking into account the areas of use. In return, the price level has always been affordable.

We will strive to be worthy of your trust and loyalty to the VIP-TEC brand.

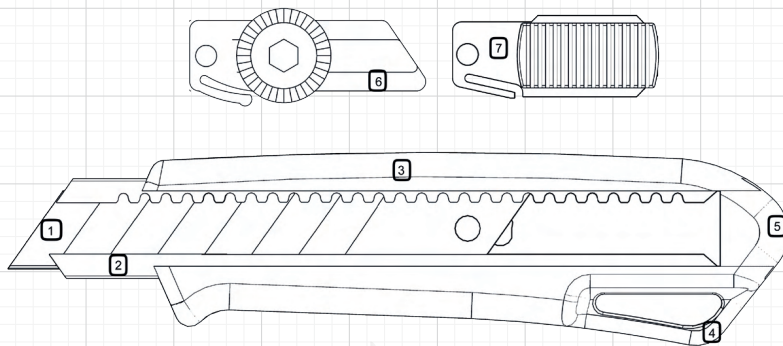

Our aim is to contribute to our economy by producing high quality products for our country and world markets.

Best regards

AR METAL INC.

ANATOMY OF VIP-TEC UTILITY KNIFE

- 1 - More comfortable and professional cutting experience thanks to double grinding snap-off blade
- 2 - Safer cutting experience thanks to extended blade channel
- 3 - Ergonomic handle that provides comfortable grip with metal and plastic options
- 4 - Hangable body
- 5 - Portable cover designed for blade replacement
- 6 - Ratchet-Lock mechanism
- 7 - Auto-Lock mechanism

PRECISION

9 mm

USAGE RECOMMENDATIONS

RETRACT BLADE INTO HANDLE WHEN THE UTILITY KNIFE IS NOT IN USE.

Utility Knife Blade may cause an injury when it is the open mode. For that reason, we highly recommend you check your utility knife blade once you finish your cutting work and retract the blade into the utility knife handle when it is not in use.

DO NOT USE UTILITY KNIFE FOR THE IMPROPER PURPOSE.

Using your utility knife for improper purposes may lead to unwanted accidents. For that reason, we don't recommend using a utility knife as a scraper, screwdriver, chisel, or kitchen knife.

DO NOT TALK OR LOOK AWAY WHEN YOU CUT MATERIAL.

Cutting work requires all of your attention that's why you should focus on your cutting works and avoid talking and looking away.

CUT YOUR MATERIALS ON STABLE SURFACE.

Please pay attention to placing your cutting materials on a stable surface. Thus you could prevent yourself from any cut caused by any tilting or tipping of the materials.

USE A CUT-RESISTANT GLOVE.

We highly recommend you wear a cut-resistant glove in order to protect your hands from any cut or nick.

KEEP YOUR BODY AWAY FROM CUTTING LINE.

So many injuries happen when people keep their body and their other hand so close to the cutting line. We highly recommend you put enough distance between your body and cutting line in order to mitigate all risks that may arise from cut injuries. We also highly recommend you set the cutting line parallel to your body for your safety.

USE PLIER, GLOVE, AND GOGGLES WHEN BREAK OFF UTILITY KNIFE BLADE.

We highly recommend you use a plier for a safe break before you break off the utility knife blade. Thus you can grasp the knife more tightly and snap off the blade with less amount of force. In addition to plier, wearing gloves and goggles also enable us to perform cutting works with a higher degree of safety.

DISPOSE OF DULL BLADE AND BROKEN BLADE EDGE IN PUNCTURE-RESISTANT CONTAINER.

As we all know that utility knife blade is sharp and it may cause injuries if we don't store them carefully. In order not to cause any injury or accident, dull blades and broken blade edges must be disposed of in a puncture-resistant container.

MAKE SURE YOU USE RIGHT UTILITY KNIFE FOR YOUR CUTTING WORKS.

Using proper utility knife makes cutting work easier and safer. If you want to know which utility knife is the best for your cutting work please contact us.

LOCKING MECHANISM

*The screw lock mechanism allows the blade length to be adjusted at the desired level during the cutting process.

ERGONOMIC BODY

*ABS Plastic body provides light weight and durability.

HANGER SLOT

It is an easily portable product thanks to its hanger slot.

SERRATED BLADE

*Serrated blade with one serrated edge to help prevent slipping while cutting.

OVAL NOTCH

*The upper part of the blade is designed for heavy industrial applications.

STAINLESS STEEL BLADE

*Stainless steel blades are long lasting and corrosion resistant.

HOLDING HANDLE

*The ABS Plastic handle makes it lightweight and easy to use for long periods of time.

NOTCH

*With the protrusion on the top, holes can be made for packaged products.

CORNERS

*Thanks to the sharp protrusions on the edges, it provides ease of cutting through the hole opened.

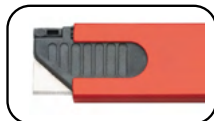

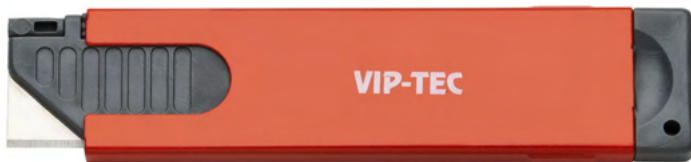

USAGE

*Can be used bilaterally thanks to its symmetrical design. Suitable for right and left hand use.

SPARE SECTION

*2 spare blades can be stored in the pull out cover.

USE

*Suitable for right and left hand use thanks to the double-sided spike.

BODY

*Aluminum body increases durability. Small and lightweight design provides ease of transportation.

CUTTER TIP

*Double-sided sharpening provides four-sided use.

ALUMINUM METAL BODY
*Lightweight and corrosion resistant thanks to its aluminum body.

SLIDER AND SCREW
*Provides cutting at different depths with three-stage slider.
*Blade change is carried out from the screw part.

HANGER SLOT
*Provides ease of product storage and transportation.

VT875128 - VT875129
